

A ATHLETICS

- LARGE GYM SOUND SYSTEM ENHANCEMENTS
- GIRLS' LOCKER ROOM
- BASEBALL LIGHTING | PHASE 1.0

FUNDRAISING GOAL: \$120,000

ENHANCED SOUND SYSTEM

The sound system within our Large Gym is an essential element to engage and entertain every person on or off the court.

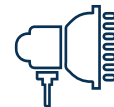

Enhancing the sound system is required to ensure all corners of the gymnasium can hear the message, amps boost the entertainment value, and a good microphone prevents the message from getting lost in static.

GIRLS' LOCKER ROOM

First large-scale upgrade in over two decades.

The project improves all areas of the girls' locker room to serve our female athletes better with fresh new finishes, furniture, and improved lighting throughout the space, impacting all female student-athlete experiences.

BASEBALL LIGHTING PHASE 1.0

Final athletic facility to receive upgraded lighting.

Lighting upgrades will enhance our student-athlete's abilities to perform at a high level with clearer visibility and improve the gameday experience for student-athletes and fans.

The upgraded LED lighting systems are a more energy-efficient lighting system.
