

HyVee Car Wash

New Construction

PROJECT SUMMARY:

This project was completed in July 2017. The 4-bay car wash delivered to an out lot adjacent to the Hy-Vee Grocery Store in Shakopee, MN. This is a new C-store compliment concept for Hy-Vee Gas. This Fullerton building package included the following: Exterior and interior wall framing, FBS roof truss system, parapet wall framing, kicker panels and exterior finishes. FFS supplied the BrickWal System to FBS with the Kansas City Brick that matches the Flagship Supermarket and C-Store.

Meet or Exceeding Owners Goals, Values and/or Expectations:

FFS supplied to FBS the BrickWal Exterior Finish in the Kansas City Brick as specified by HyVee Construction. HyVee looked to FBS to open the Car Wash at the same time as the C-Store with the same type of finishes. The FFS BrickWal material installation at FBS was quick and easy and is an excellent alternative to masonry on-site. Masonry labor is difficult to find and eliminates one less trade on-site. FBS installs the FFS material in our controlled factory environment and allowed the HyVee car wash building package to be set in 3 days which allowed the other sub trades and specifically the car wash equipment sub-contractor to get in and complete their portion of work in a timely manner.

PRODUCT:

- BrickWal – Kansas City Brick to match flagship supermarket

LOCATION: Shakopee, MN

CLIENT: HyVee Construction
