Phase I of the vision of Grandma's House has become a reality, because of you and the support you have given us these past eight years. It was not only your financial support, but your encouragement and efforts in giving your time and service in whatever area we needed help. Because of you, the afterschool tutoring program for K – 6 grade students is finished. The vision is almost complete. It is our goal that within the next 2 – 3 years all three phases of the vision will be in place and solidified. Thus, leaving nothing else to do but fine tune and maintain, "Grandma's House Literacy Center", for students.

Phase II, Grandma's House Preschool, for 3 - 4 year olds, and Family Resource Center will be opening by the first of January.

Phase III, our 7th and 8th grade on-line math academy will complete the vision of Grandma's House. When this is done, we will have an educational complex that provides academic support for students in preschool through middle school.

We are in hopes that you will invest in the future of our children, by your continual support these next 2-3 years and that you will continue to attend our Annual Gala Celebration Fundraisers.

Thank you for all that you have done and continue to do for the children in our community.
