

Trail's End Popcorn Digital Take-Order Forms

Trail's End is pleased to announce that our mobile take order form is available for download from the [Apple](#), [Android](#) and [Windows](#) App Stores. This app will allow Scouts to take orders on a mobile device and accept payment in cash, check or credit card. Orders will be automatically uploaded to the Trail's End Popcorn System rolling into the units' orders. Importantly, this app is not part of the online selling platform; therefore, product will still need to be delivered to the consumer. Online selling at trails-end.com will continue to be direct-to-consumer delivery.

Enabling the app requires both council and unit set up in the Trail's End Popcorn System. The council will need to give permission for app orders and assign delivery locations to the orders and for each unit on the app enabled orders. The unit will need to provide banking information. Step-by-step instructions are provided in the attached. The documents include both a simple one-page overview and detailed instructions for all users.

As always, please feel free to contact your Trail's End Representative if you have questions or need assistance.
