# Are You Prepared for a Back Country Emergency?

**Results from the Spring Wilderness and Remote First Aid Course**

**By John Sullivan**

One of your Scouts slips and tumbles down a hillside a day from the trail head. He is unconscious and you suspect a head or spinal injury. Would you know what to do? Twenty-seven Scouts and Scouters are better prepared to handle such a back country emergency. They completed the Council's Wilderness and Remote First Aid Course on April 29, 2017. Congratulations to:
