

Council Properties Report

By Properties VP Scott Suchan

Newly cut in road to camp. This leads up to what we used to refer to the “Old Bone Yard”, but is now the site of our new parking lot, and future site for a Ranger’s shop and storage building. You will no longer enter camp through the old gateway.

The new parking lot is near completion. The new parking lot will more than double our previous parking capacity. A new trail starting in the far corner past the back hoe will lead Scouts directly into camp.

New staff cabins under construction near the old parking lot. These cabins will comfortably house four people each. This summer 16 luck staff members will stay in these new accommodations.

New docks are floating inside the swim area at "The Beach" at Fire Mountain. The docks are being extended an additional 20', which will provide 100' of swimming inside the docks. Note the Chinese Windmill Palm Trees on the right-hand side of the picture. They survived the winter nicely.

We are working quickly to complete projects in time for our summer camping season!
