

Mercy Care is proud to introduce...

Jason Glenn
Network Manager
Mercy Care

Jason came to Mercy Care in July 2019, as a Network Manager (Contracts Department) where he rapidly acclimated to the process in order to hit the ground running. His vast knowledge of dealing with complex and large volume agreements was put to the test as he was faced with Mercy Care's multiple lines of business, everchanging environment and sharp business ethics. Along with the help of a great team, Jason has been successful in fitting right in!

Jason started his career in healthcare over 22 years ago with a small health plan called DMC-Care, part of the Detroit Medical Center located in his home state of Michigan. His quick understanding of the industry by working in various capacities, led him to greater responsibilities and to many good mentors that shared with him many philosophies that hold true even today; i.e., "Never present a problem, without your best solution" and "Activity, does not always equate to results". Jason uses these essentials to this day which help to keep him focused on the known established goals in both his personal and professional life. Jason moved his family to Arizona in pursuit of a warm climate and better opportunities in his field of work. That move has proven to have been very successful for both him and his family.

Jason holds to three essentials - Faith, Family and Friendships. These important values are why he and his wife have celebrated 32 years of marriage and have three beautiful children ages 17-30. Now that his oldest has married, Jason and his wife look forward to the day when their names change to "Nana and Pawpaw", but no grandbabies just yet. For now, enjoying family and some quiet time when possible, equates to a good day!
