

## Workforce Development Training and Resource Site

Mercy Care's Workforce Development department is proud to announce the roll-out of our **Workforce Development Training and Resource Site** which is available on our **Provider Training and Education** web page for providers.

As you are aware, our behavioral health providers have competency-based training available to them through Relias. In the past we have not had any type of computer-based training materials available to our physical health providers, with the exception of our Network Management Webinars offered by our Network Management department. With the implementation of our Workforce Development Training and Resource Site for providers, we have developed several free courses that are available for you to take at a time that is convenient for you.

Our ultimate goal is to expand upon our current training. This can include physical health topics or Mercy Care procedures that you may be unsure of and want further information. We welcome all input from our provider community regarding ideas or suggestions. If you would like to offer any suggestions, please feel free to contact us at [wfd@mercycareaz.org](mailto:wfd@mercycareaz.org).
