We contribute to create conscious promotions

Aligned with the growing need to support social and responsible production, recycling and reutilization, we continuously re-examine the way we approach our product and material selection, manufacturing and print production processes. Dedicated to sustainability and the development of a responsible collection, we can project our brands and environmental goals whilst aiding the reduction of landfill waste.

As we contribute to create conscious promotions, choosing the right materials is an essential part of our strategy. Whenever possible, and whilst focussing upon functionality and quality, our collection is, where relevant, gradually upgraded or substituted with newer and more

sustainable materials. This means selecting high quality materials that are recycled or lend themselves to recycling, materials derived from renewable sources and ethically sourced. The centrepiece of this is supporting our suppliers in implementing innovative processes to produce more sustainable materials.

REUSABLE MATERIALS

Items made from natural and reusable materials such as glass and slate can be used over and over again.

They are a durable choice that not only helps in reducing waste but also results in high-quality items with a more premium feel to them. They can also be recycled.

RENEWABLE

Renewable materials are great for the environment as the natural resource can replenish itself generation after generation.

After harvesting and sometimes with the help of recurring processes, the resource will grow back by itself over time and can be harvested again. This makes renewable materials one of the most sustainable choices around.

**CORK
BAMBOO**

MO9894

MO9623

CORK

Cork is the bark of the selfregenerating cork oak tree. It is ranked among the most durable organic materials with the property of stabilizing the air temperature and humidity.

It is a very flexible material and can be processed for production in simple natural way. It has good adhesive properties, making it easy to use in combination with different materials. In general the cork industry is regarded as one of the most environmentally friendly. Cork is 100% natural and biodegradable.

ETHICAL FABRICS

Ethical fabrics are materials that are organically processed, so no pesticides are being used. Our materials are recovered from old or unworn clothes and waste fabrics. So up-cycled.

HEMP
ORGANIC COTTON
RECYLCED FABRICS

HEMP

Hemp is one of the oldest and most eco-friendly textile fabrics. It is made from fibres of the fast growing cannabis plant that is naturally pest resistant and that can grow without the assistance of fertilizers and pesticides.

This makes it a 100% organic crop and very environmentally friendly. Not only the production process of the hemp fibers is very sustainable, but also due to the fact that these organic fibers are 100% recyclable.

RECYCLED FABRICS

Recycled fabrics are made from waste fabrics (any textiles). Collected textile waste is reprocessed in to fibres and then back in to reusable fabrics an used for the production of bags, garments or linen.

Most of the manufacturers work with two streams : pre-consumer waste (scrap from production) and post-consumer waste (used textiles collected). The colour segregation occurs during the process to avoid as much as possible the re-dyeing of the fabric.
