

CIO Solutions has been providing customized information technology solutions since 1986. CIO's Engineering Team is professionally trained to look at the big picture of your business: your vision and goals, your current information technology infrastructure, your short and long term data & voice needs, and your current and future support requirements. Many years of experience combined with close partnerships with the industry's leading vendors uniquely qualify CIO Solutions to design, manage, and support highly-sophisticated technology environments.

What we do:

In addition to general IT management and consulting, CIO's IT expertise includes: Private Cloud Computing, Enterprise Storage, Security, Remote Communications, Wireless, and VoIP Phone Systems. You can rely on CIO Solutions to provide you with a competitive edge by optimizing your IT infrastructure to fit your future. CIO Solutions relies on long-term client relationships; these relationships provide a high level of trust and satisfaction for both CIO's clients and staff alike.

Please visit www.ciosolutions.com, for more information on the services offered.

What makes CIO Solutions different:

CIO engages with its clients through education. CIO takes the time to get to know your business, who you are, what you do, and what your challenges, needs, and points of pain are. Then they teach you what they have to offer and explain how these technology solutions can address your business needs. By adhering to this approach you will benefit from a loyal, long-term partner who works *with* you instead of just *for* you.

CIO operates according to 10 Core Values. These Core Values ensure that the team is consistently adhering to best business practices and actions which promote long-term relationships with clients. CIO is proud to be a trusted IT provider whose recommendations and assessments are always presented with honesty and genuine care for the client's business needs.

Offering clients a full portfolio of IT solutions, CIO has established partnerships with both local and regional organizations that complement their strengths and round out their solutions. This partnering helps to deliver the most comprehensive IT support available. For more information on CIO's partnerships please visit the 'Partners' tab at www.ciosolutions.com.

Whether your company needs help in the form of IT support, end-to-end integrated IT services, or perhaps something in between, CIO Solutions can show you how to better leverage your IT investments.
