Recent activities

As of February 2019, **573 patients** with congenital heart disease on NOACs have been enrolled in collaboration with 38 participating centers all over the world.

More details of the NOTE data will be presented by Barbara Mulder during the 29th International Symposium on Adult Congenital Heart Disease in Skamania.

From now on, Tara Hankel will take over the position of Hayang Yang as study coordinator. Tara Hankel is a Technical Physician and eager to join our inspiring, successful and pleasant collaboration on the use of NOACs in ACHD.

Last but not least, we are delighted to inform you that **Helen DeVos Children's Hospital** has started to actively enroll patients on NOACs!

Tara Hankel, Technical Physician

Best regards,
Tara Hankel, t.c.hankel@amc.nl
