

Pediatric Cardiac Imaging Physicians – Cohen Children’s Heart Center, Northwell Health– NYC Suburbs

The Department of Pediatrics at the Steven and Alexandra **Cohen Children’s Medical Center** of New York, Northwell Health, is seeking **TWO** physicians to join the rapidly growing Cohen Children’s Heart Center as members of our echocardiography laboratory’s core imaging team with a focus on fetal echocardiography. The ideal candidates would be BC/BE in Pediatric Cardiology and have spent additional time in a dedicated fourth-year cardiac imaging fellowship with a focus on fetal echocardiography, or have spent significant time working in the field. These clinicians will participate in the inpatient and outpatient clinical activities of the division. A strong interest in helping to grow our programs and pursue research in the field of echocardiography is highly desirable, as is a commitment to work and partner with multidisciplinary team members.

The Cohen Children’s Heart Center sits across the Department of Pediatrics of Northwell Health. Under the leadership of the System Chiefs of Pediatric Cardiology, Dr. Jeffrey Gossett, and Pediatric Cardiothoracic Surgery, Dr. David B. Meyer, the Heart Center functions as a highly collaborative, multidisciplinary team focused on clinical and academic excellence. The Heart Center is rapidly growing with dramatic increase in our clinical programs over the last few years. The institution performs more than 250 cardiac surgical procedures annually with 29 cardiologists (12 core imagers) helping to assure outstanding outcomes, and with a strong commitment to further growth including our soon to be constructed dedicated pediatric cardiac intensive care unit. The Heart Center’s director of cardiac imaging, Dr. Ira Parness, has a deep reputation for excellence in imaging and is a renowned educator. Under his leadership, our imaging team currently reads over 15,000 studies including over 4000 fetal echocardiograms per year. The Northwell Advanced Fetal Care Program was recently opened and is collocate with pediatric cardiology helping to assure seamless patient care. We have a team of two dedicated nurse coordinators for our multidisciplinary fetal heart program who assure communication between the cardiology, obstetric, surgical and other supporting services, thus extending to prenatal life our core commitment to patient-centered excellence. Within our imaging group we also have a robust three-dimensional imaging program that serves to complement the echocardiographic program.

The Steven and Alexandra Cohen Children’s Medical Center is the largest pediatric teaching hospital in the New York metropolitan region, with more than 13,000 admissions per year and a catchment area of over 8 million people. It is the sole tertiary pediatric medical center of the 23-hospital Northwell Health system, formally the North Shore-Long Island Jewish Health System and has the only Level-1 Pediatric Trauma Center and ECMO Center on Long Island. CCMC is located in the New York City suburbs bordering one of the most diverse communities in New York City. Team members and their families live throughout the entire New York Metro area including on Long Island, Westchester and in Manhattan.

The Cohen Children’s Heart Center provides more than 14,000 inpatient and outpatient visits annually. We are one of the highest volume programs in New York State, and the only children’s hospital in Long Island that offers comprehensive cardiac and cardiac surgical care from pregnancy through infancy, childhood, adolescence and adulthood for congenital heart disease. The Division of Pediatric Cardiology has a long and well-recognized tradition of providing exceptional cardiovascular care throughout the region.

We offer a competitive salary and benefits package. In addition, an academic appointment with The Donald and Barbara Zucker School of Medicine at Hofstra/Northwell is commensurate with credentials and experience. Physicians will be employed as members of Northwell Physician Partners, the seventh largest medical group in the country. Northwell Health is committed to training, supporting and nurturing physicians from all backgrounds. We fully understand that diversity is integral for our

institutional excellence and a means to attaining health equity. As a result our diversity and inclusion efforts are a part of everything we do, from education, to clinical care, to research, to physician well-being. One of our many strengths is our diverse patient population and our expectation is that our diverse patient populations receive equitable care, irrespective of who they are. As a result, we continually recruit a diverse physician workforce to meet the needs of our diverse patients.

For further details and opportunities, please contact:

Dr. Jeffrey Gossett, Vice President and System Chief, Pediatric Cardiology, JGossett1@northwell.edu or Lindsay Appelman, Office of Physician Recruitment, Northwell Health, OPR@northwell.edu.
