

Adult Congenital Heart Disease Cardiologist - Nationally Recognized Heart Program in Indiana

The Indiana University Health accredited ACHD Program is growing to meet the needs of adult and transitional pediatric patient volume. As one of the nation's most respected programs for diagnosis and treatment of heart disease and the only program of its kind in Indiana, we are actively seeking two physicians to join our team of highly skilled providers: one for adult congenital patient care at the Adult Academic Health Center (IU Health Methodist Hospital, Indianapolis), and another for combination of adult and transitional pediatric congenital patient care at the Riley Heart Center at Riley Children's Health.

Highlights:

- Clinician-Educator Faculty appointment and benefits through Indiana University School of Medicine
- Clinical and basic research opportunities for collaboration with the Krannert Cardiovascular Research Center and Herman B. Wells Center for Pediatric Research
- Opportunity to grow multidisciplinary clinical programs and research
- The IU Health and IU School of Medicine Cardiovascular Institute aligns clinical, research and education missions across a statewide health system and medical school, the largest in the country
- Riley Children's Health Pediatric Cardiology program is ranked sixth in the country by *U.S. News & World Report*, as well as a top 15 high-volume heart program in the nation for effective clinical outcomes
