

## WHS Wellness Tipline

WHS established an online Wellness Tipline several years ago as another way for students or other concerned persons to report concerns regarding a student's wellness. These concerns can be related to mental health, chemical use, social isolation, bullying, harassment, etc. If it is an emergency, there is a disclaimer on the form to call 911.

The link to the Wellness Tipline can be found on the [WHS home page](#) as a tab on the left hand-side.

Once the form is submitted, a WHS support staff (social worker, counselor, chemical health counselor, administrator or dean) will follow up with the student the next school day. Each year we receive many tip line reports that help us identify students that may be struggling and give us the opportunity to provide help and support to the student.

Concerned persons can also contact any support staff directly to report any concerns. If you have any questions about the Wellness Tipline, please contact one of the WHS social workers:
