Laerdal Airway Management Trainer

Realistic practice is the key to developing proficiency in airway management skills. The Laerdal Airway Management Trainer's lifelike upper torso and head simulates real-world complications when practicing a variety of intubation, ventilation, and suction techniques.

25000033 Laerdal Airway Management Trainer

Consumables:

252090 Airway Lubricant (180 ml)

252800 Concentrated Simulated Vomit

Deluxe Difficult Airway Trainer

The Deluxe Difficult Airway Trainer is designed for training the management of difficult airways and features a manually inflatable tongue to simulate obstructed airway.

261-10001 Deluxe Difficult Airway Trainer

Consumables:

250-21050 Airway Lubricant (45 ml)

261-00250 Neck Skins (pkg. 6)

200-00250 Cricothyroid Membrane Tape (1 roll)

Pediatric Intubation Trainer

Anatomically accurate reproduction of a pediatric torso designed for teaching the differences in pediatric and adult anatomy for airway management procedures.

255-00001 Pediatric Intubation Trainer

Consumables:

250-21050 Airway Lubricant (45 ml)

Laerdal Infant Airway Management Trainer

Realistic practice is the key to developing proficiency in airway management skills. The Laerdal Infant Airway Management Trainer provides the realistic anatomy of a three-month-old infant for teaching and practicing basic and advanced airway management skills.

250-00250 Laerdal Infant Airway Management Trainer

Consumables:

250-21050 Airway Lubricant (45 ml)

Laerdal Neonatal Intubation Trainer

Laerdal Neonatal Intubation Trainer allows teaching of intubation skills on the newborn baby. Robust and realistic, this model allows students to undertake training that is directly transferable to the clinical setting.

250-00101 Laerdal Neonatal Intubation Trainer

Consumables:

250-21050 Airway Lubricant (45 ml)
