RUN'ing Ahead

RUN has been steadily advancing through some of the busiest cycles of the year. Since last month's series of Power Hours and research action meeting with Assemblymember Mainschein, RUN held a successful Regional Convening at the end of February, with 36 participants in total. Regional Convening participants were new and experienced RUN leaders with great enthusiasm for advocacy and leadership. We are also excited to have had such a great representation of our community partners from Community HousingWorks, City Heights CDC, MAAC, Eden Housing, and Chicano Federation.

Housing California is postponing Lobby Day because your health and safety is our top priority. Especially considering that many RUN members belong to what public health authorities consider "high-risk populations" — such as older adults and individuals with conditions including high blood pressure — this is the best step to ensure the safety of our members.

We are currently considering dates to reschedule in the next few months and we will be in touch when a decision is reached.
