

Leverage Epic's Technology to Connect with Other Clinicians!

- All Providers should download and use **Haiku**, Epic's Mobile Application to access Hyperspace on your smartphone!
- **Secure Chat** is a trusted means of real-time messaging members of the Patient Care Team, including consulting providers, nursing, dieticians, and case managers.
 - **IMPORTANT:** Please ensure that the Provider Care Team is accurate in Epic to ensure the correct clinicians are contacted via Secure Chat.
 - This includes reassigning the Attending Provider and updating the First Contact information real-time in Epic.
- With **Haiku** and **Secure Chat** readily available, the need for phone calls (and phone tag) **may be** reduced, if all providers and clinicians are leveraging these technology wins!
 - **IMPORTANT NOTE:** For crucial patient care communications, a phone call may be necessary to ensure receipt of messaging.
- **IMPORTANT:** Scan the QR Code below to configure Haiku!
