Ambulatory: Close Erroneous Encounters Quickly with Visit Information

When an encounter is documented or opened in error, there is a quick and convenient way to change it to an erroneous encounter.

How it Works

1. Refer to steps 1 thru 9 mentioned above to open your patient's erroneous encounter.
2. Go to the **Rooming Activity** tab and select the **Visit Information** section.
3. In the **Reason for Visit** search field, enter error and choose "Error (VOID this visit)".

Note:
   a. Entering "Error (VOID this visit)" will not require the following information for office visits:
      i. Note
      ii. Diagnosis
      iii. Level of Service.

   b. Delete any other Reason for Visit listed in this section.

4. Select **Sign Visit**.
