

Physician Acknowledgement Workflow Tipsheet

Purpose: This process is a way for having documents indexed to Epic that require Physician (Provider) signature/acknowledgment.

Process Documents that require Physician Acknowledgement can be scanned or faxed to your office OnBase efax number. **Please reference OnBase tipsheet for this process. *Scanning through Solarity is the ideal method for handling of all documents requiring Physician acknowledgement. This will assure that the documents get to Epic as quickly as possible.***

Examples of items that require Physician Acknowledgement:

- **Test Results** – Any results for tests ordered by the Providers that arrive in the office on paper (Labs, Radiology, etc)
- **Information for New Patient appointments**
- **Reports of referrals made by the Provider.**
- **Immunization Reports**

What ***does not*** need Physician Acknowledgement:

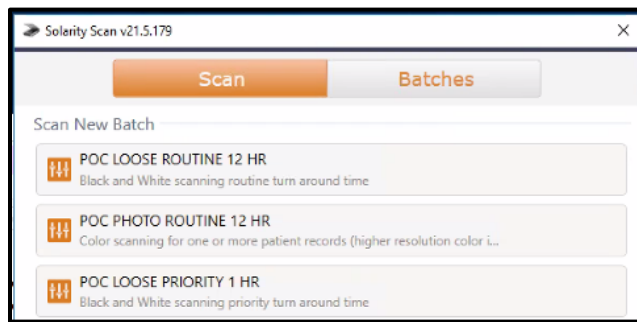

- **Documents already signed by the Provider in your office.**
- **Administrative documents** – Prior Authorizations, Denial Letters, Correspondence, etc.
- **Packets** – Surgical Scheduling, DME Orders, Sleep Study Orders, etc
- **Forms** – School Forms, Home Care Orders, Refill Requests, etc
 - **NOTE:** These must all be completed and signed prior to scanning.

Important Note:

With this process, it is the responsibility of the Providers and Practice Staff to assure documents are reviewed and processed using the proper workflow.

Physician Acknowledgement:

1. Prep documents based on **Capture Class** for scanning (***make sure the documents are separated per Physician to be acknowledged***). Place Documents in the scanner and select the **appropriate Capture Class** for the batch (**only available for the three listed below**).

2. Select the scanning location from the dropdown menu, enter **Scan User Name**, then click **Scan**.
 - a. If Provider Acknowledgement **is required**, search and select the Provider name in the **Acknowledging Provider** field.
 - b. If provider acknowledgement **is not required**, leave the **Acknowledging Provider** field blank.

The screenshot shows the 'Scan Attributes' dialog box. At the top, there are two fields: 'Acknowledging Provider' (a dropdown menu) and 'Scan User Name*' (a text field containing 'Jane Test'). These two fields are enclosed in a red rectangular box. Below this, there is a 'Location Selection' dialog box, which is also enclosed in a red rectangular box. The 'Location Selection' dialog has a dropdown menu and an 'OK' button. At the bottom of the 'Scan Attributes' dialog, there is a note: 'NOTE: those attributes with a * require a value to be entered at this time.' and three buttons: 'Cancel', 'Scan', and 'File Import'.

Please reference the **Solarity – Batch Scanning Tipsheet**.
