Cath Lab and Structured Reporting Talking Points

This document provides information regarding significant changes in workflow from the heritage/legacy system to Epic. This is not a training document and users must attend training to gain access to the system.

What's New

STEMI Workflow

- One-click STEMI case creation to place order and prefill case detail fields.
- Scheduling the case is a **critical** and **required** manual step to:
  - Create the log for documentation
  - Integrate with downstream systems i.e. QSight for supplies and Merge for hemodynamic monitoring
  - Complete the case log

Intraprocedural Log

- The workflow in Merge will change with implementation of Epic.
  - Intraprocedural documentation will be in the Cupid intraprocedural log within Epic
  - Hemodynamics will be captured in Merge.
  - Merge data will be exported and sent to Epic.
- **Important:** *Do not open* the patient in Merge before they are marked **"in room"** in Epic so that the data flows over correctly
  - Open the patient in Merge, start your vitals and record your waveforms.
  - If you need to calculate any advanced hemodynamics remember to add HGB and height/weight.
- Once the case is marked as **"case end"** you can export the data from Merge to Epic. It usually takes less than 2 minutes to come across and this will also populate the physician's reporting.

QSight – Supply and Implant Management

- Integration between Epic and QSight is set for every minute. Scanned supplies will be available within a minute of entry.
- Similar to current state, the Circulating Nurse may choose to save packaging to ensure all supply/implants have been scanned and charges are entered.

Cath Structured Reporting

- Providers procedural findings will be documented in Cupid/Epic.
- *Completion* of the case log at the end of the procedure end is a requirement for the provider to finalize the procedure report.
- The cath lab procedure report *must be finalized* in order to *Post* the case log and file charges.
  - Reports are available in Epic to identify unsigned/un-resulted studies
- Physician documentation using templated smart form
  - Saves discrete data for analytic purposes
  - Ensures standardized result reports
  - Point-and-click documentation speeds up resulting workflows

Learn More

Learning Home Dashboard: Invasive Cardiology Learning Home Dashboard

Remember – Tip sheets on the Learning Home Dashboard.

The changes identified in this document are significant to your hospital. Please reference the following Tip Sheets:

- Create a Case
- Entering Pre-Procedure Orders for Existing Cases
- Intraprocedure Documentation
- Intraprocedure Care
- Invasive Reporting Guide
- Manage Scheduled Cases
- Resolving One Time Supplies, One Time Implants, QSight Issues
- Schedule a Case
- STEMI Creation, Scheduling, First Documentation
- Timing Events for the Invasive Labs

Note that the information on the Learning Home Dashboard is current. If you download or print a copy of the Tip Sheet, it may not reflect the most up to date information. Make it a habit to view Tip Sheets within Epic frequently.

Remember

Playground
Once you complete your training, and utilizing the login information provided in the classroom via your workbook, you may access the Epic Playground environment. Use the general sign on information (listed in the Training Companions and Exercise Booklets) to access the Playground environment to continue your education, and practice the new Epic workflows.

Focusing on the changes identified in this document will help your hospital in the successful implementation.

As part of the Playground environment, you will have access to the Learning Home Dashboard to learn about other changes.

You Can Also

View the demonstration of these changes

A demonstration was held and recorded for these significant changes in your workflow. The demonstration is loaded to NetLearning and the user can assign it to themselves. The name of the demo is Change Management CUP1 Cath Lab and Structured Reporting Cath Lab and Structured Reporting.

You may also watch the demo Change Management OR5 Life of a Supply to learn more about supply management.

Utilize the Learning Opportunities (Enroll) button and search for Change Management. A full list of demonstrations will present and the user can select the session they would like to watch.
Questions should first be sent to your site and department Leads. If they cannot answer the question, you may submit a question to the Training Team through the ServiceNow process.

How to:

- Pre-production: Contact the Service Desk and submit the question to the Training Team via ServiceNow ticket.

- In production: from the patient chart or the screen, you have a question on, submit a ticket via Get Help within Epic.
URGENT assistance should be requested via the Service Desk. They will help you triage the issue and prioritize your ticket accordingly. How do you know if it is urgent? See your department leads or your SuperUsers. If patient care is impacted, call the Service Desk.
