Glossary

DEFINITIONS:

Closed Price

Calculations are based on-sale date. Prices do not account for seller concessions.

Median Price

This represents the point at which half of the homes that sold in a given month were priced higher and half were priced lower.

Average Price

The mean sales price for all closed sales in a given month.

New Listings

A count of the properties that have come onto the MLS in a given month.

Active Listings*

A snapshot of properties available for sale in as "active" status. Also known as supply or inventory.

Pending Listings*

A snapshot of the properties on which contracts have been accepted and listing status has been changed to "pending". Also known as demand.

Days in MLS

The average number of days between when a property is listed (active) and when an offer is accepted (pending).

Months Supply

The inventory of homes for sale at the end of a given month, divided by the average monthly pending properties from the last 12 months. This - in theory - tells us how long our active inventory would last without any new inventory coming onto the market. Also known as the absorption rate.

Pct of Closed \$ to List \$

The percentage a home sold for compared to what it was listed for. Calculated by dividing a listing's sales price by its list price, then taking the average or median for all closed listings in a given month, not accounting for seller concessions.

Price Per Sq Ft

The sale price of a home divided by its finished square footage. Median or average sales price can be used to find this calculation are based on sold data. Prices do not account for seller concessions.

*This is a status-driven stat that will vary based on the exact time and date the information is pulled by the data provider.
