

Valhalla Cockpit Details:

Each [Valhalla](#) cockpit is crafted for maximum functionality and clean execution. The deck offers open, clutter-free space with precisely installed hatch lids that create a seamless surface underfoot. You won't find any exposed hardware to snag lines or skin. From the [28](#) to the [55](#), our design, engineering and construction teams go to great lengths to ensure 360-degree toekick access. This results from smart design, custom-built components and precision assembly—whether it's a molded-in detail, a custom cooler base or a structural interface between the coaming and hull.

Additional features include:

- Compression latches and robust gasketing to prevent water intrusion
- Padded coamings for all-day comfort
- Pressurized transom live wells plumbed to sea chests and regulated from the helm
- Aggressive nonskid that's easy to clean
- Transom seating that folds flush to open up the cockpit
- Helm seats with integrated rod and drink holders
