

REPRESENTATIVE RAMÓN ROMERO

ACEC Texas Presents Representative Ramon Romero with the “Champion of Infrastructure” Award for the 89th Legislature

Austin, TX – The American Council of Engineering Companies of Texas (ACEC Texas) is pleased to recognize Representative Ramon Romero (D-Fort Worth) with the **Champion of Infrastructure Award** for his work on behalf of Texas engineering firms during the 2025 Legislative Session.

The Champion of Infrastructure Award recognizes elected officials who support the engineering business community by promoting policies that encourage infrastructure development and create a fair, business-friendly environment in the State of Texas. The award recipients are chosen by the members of the ACEC Texas Public Policy Council.

Representing the heart of Fort Worth since 2015, Representative Romero has supported the engineering business community on several issues, including as a member of the House Committee on Licensing and Administrative Procedures, which oversees all professional licensing issues. In addition, Representative Romero was a leader in promoting water and flood infrastructure policies as a member of the House Committee on Natural Resources.

“The State of Texas continues to experience rapid growth and consequently, water supply and flood mitigation challenges,” said ACEC Texas President Peyton McKnight. “Representative Romero was a steadfast advocate for funding for Texas water and flood projects during the 2025 Legislative Session and helped ensure a consistent water supply for Tarrant County. ACEC Texas is proud to recognize his work and honor him with the Champion of Infrastructure Award.”

ACEC Texas is the business association of Texas engineering firms. The organization is committed to advancing the private practice of consulting engineering, enhancing markets for private engineering services, educating the public on the importance of infrastructure investment, and promoting sound business practices within the industry and its client base.
