

ISPE Trainings Brought to The Region

No deviation has recently celebrated Pierre Winnepenninckx and Shanshan Liu being qualified by ISPE as Instructors for:

- Commissioning and Qualification Training Course (T40) – Pierre and Shanshan
- GMP Sterile Pharmaceutical Manufacturing Facility Training Course (T12) – Pierre
- ATMP Manufacturing Training Course (T64) - Shanshan

ISPE is missioned to be the global industry leader in connecting pharmaceutical knowledge. It's equally important for our local affiliates / chapter and ISPE members / volunteers to support this mission, so a better global reach of knowledge sharing is achieved.

It is crucial to maintain the technical content of the training courses relevant. The training materials are developed based on regulatory requirements, technical guidelines, industry best practices and current trend.

As ISPE qualified instructors, not only will Pierre and Shanshan bring their own wealth of experience in the pharma industry, but also the knowledge and expertise from the entire team collectively. It is principle for us to deliver the content with case studies that the trainees can relate to.

Always, we keep up with the global regulatory trend and technology advancement and deliver the knowledge in the regional context.
