Text-Based Informative

An essay that informs, teaches, or explains about a topic you read about

Crickets are a kind of bug. They can live in many spots. You can even keep them as pets.

First, crickets like to live in grass. They can hide in tall grass. They like to live where it is hot and sunny.

Second, some people keep crickets as pets. It must be funny to have them inside! You would have to keep them in a tank.

In all, crickets are a neat bug. They can live in many spots, even in your home!
