POC Circuit Board Repair

20+ Years of POC Operations & Design Experience!
Highly Experienced Engineers & Technicians!

Quality & Timely Repairs
Most Repairs Completed in 2-3 Weeks
Expedited Repair Service Available!

Convenient Pick-up & Delivery Service Available in West & Central Texas!

Trusted by Major Operators to deliver quality POC services & parts!

WE REPAIR...

Baker 8800 POCs
Baker M2000 / ePIC
EXS1000 RTU
WellPilot
Lufkin SAM Controller
EXOR HMI

Quality & Timely Service to Help Keep Your POCs Running Efficiently!

Polished Rod Load Cells & Cables

We also offer both flat and spherical washer plates.

1

We offer stainless steel, hermetically sealed polished rod load cells for pump off control.

2

Both 30K and 50K load cell models are available.

3

We also offer load cell cables. Both armored and standard cables are available.

4

Our precision load cells are designed with the latest sensor technology to be accurate and durable in harsh oilfield environments.

POC Cable & Sensor Solutions

1. Dual-axis Inclinometer with Mounting Kit
2. Armored & Standard Cables Available
3. Position Wands with Standard or Armored Cables
4. Coiled Load Cell Cables in various lengths
5. Quick Delivery & Most Items are IN STOCK!

Wireless Load Cells from Flintec

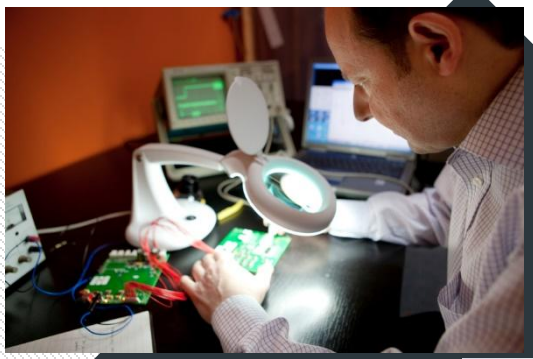

We are NOW offering high quality Flintec Wireless Load Cells that are UL Class 1 Div 1 rated with integrated position sensor available. We also offer a Retrofit Kit to convert your wired load cell to wireless.

- 30K & 50K capacities with 100 readings per sec.
  Eliminates the need for the cable connection
- Low power consumption
  12-18 month battery life with regular D-cell battery
- High signal strength
  Encrypted communication
  100-1000 ft range
- Retrofit kit compatible with most wired POC load cells
- Built-in Position sensing capability
  Synchronized with load measurement
- IP67 and rated -70 to 175 deg F
  UL Approved Class 1, Div 1

Engineering Services

Our team has a broad range of expertise and experience to deliver engineering projects to meet your specific needs and requirements.

1. Industrial automation and control system design
2. Embedded system , printed circuit board (PCB), digital signal processor (DSP) design and development
3. Printed circuit board (PCB) repair and refurbishment for oilfield automation equipment
4. Software development, user interface design, web-based applications and mobile app development
5. Communication protocol development and system integration
6. Industrial Internet of Things (IIoT), machine learning, predictive analytics and artificial intelligence
