

Books in the library are organized in two ways:

Non-Fiction

Fiction

Non-Fiction books follow the Dewey Decimal system. Their cataloguing number called a Call # is on their spine and it shows a Number, followed by the first three letters of the author's name (i.e.: 900 UHR). When you look in the computer system (Destiny Discover), it will provide the call number, which you then can find in person by looking on the shelves.

Fiction books are organized by genre. Each genre has a colour assigned to it. The colour key is located at the end of the fiction shelves in the middle of the Learning Commons. The Call # for Fiction consists of "F" for Fiction followed by the three first letters of the author's last name (i.e. If the author was I. Uhrich the call # would be F UHR)

When looking in Destiny Discover, the system will provide the "genre" of the book as the sublocation that it is physically placed in on the shelves.
