

# NPL's Seed Club

**When: Saturday, July 13, 2019**

**Where: Fodor Farm 328 Flax Hill Rd.  
Norwalk, CT 06854**

**Time: 2:00 - 3:00 PM**

Cathy Smith, member of the Pollinator Pathway Organization and the Norwalk River Watershed Association will be giving us a guided tour of the native pollinator-friendly plants in the main gardens of Fodor Farm (planted courtesy of Pollinator Pathway!). She will talk about the benefits of native plants for butterflies and bees (and other pollinators), as well as why we need our pollinators, and why they are in sad decline.

Seeds!! Cathy will also be sharing her seed knowledge with us! Topics will include “self-sowers,” “preparing the ground,” and “saving seeds.”

We will visit Sally’s and Maria’s (your friendly Library Assistants) gardens to see what they’ve been up to. If any of you have gardens there, we’ll take a peek!
