

Connect

DASHBOARD

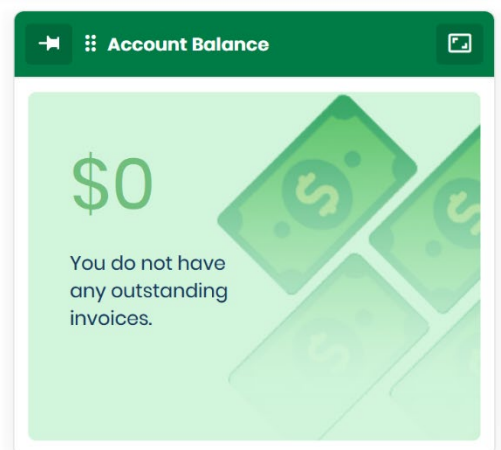

Connect your online world with Connect Dashboard – Coming June 19th!

The Member Portal (the place where you go to click on Matrix and pay your bill) will be receiving a major upgrade and will henceforth be known as the Connect Dashboard. It will have all the features that you are accustomed to currently and provide many new features and customization capabilities.

Easy Access to PPMLS™, Account Balances, Class Registration, & More! – Connect gives you a central login to unify your online experience and make multiple daily logins a thing of the past. The RSC Services section displays all of RSC's important sites, such as PPMLS™, ShowingTime, and SentiLock. The PPAR Member Services section displays all PPAR's important sites, such as your Account information, Education information, and Event Calendar. Simply click the icon and you're there!

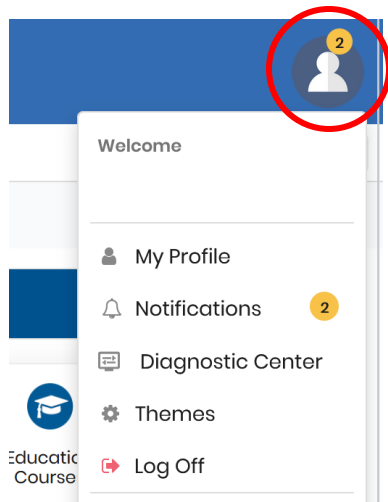

Integration with PPAR's Member Portal provides modules for billing and other features, allowing you to quickly view your account balance and pay invoices, or view upcoming classes with direct links for registration.

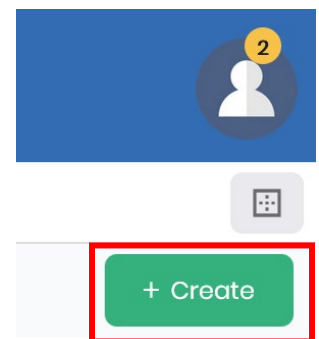

Customizable Dashboard – Customize the look and feel of your dashboard for a personalized experience and increased efficiency.

Clicking on your **Profile Icon** will give you a drop-down menu. From this menu, you can update your profile, and switch between light and dark themes from the **Themes** menu.

Create Customized Modules - Add links to your professional or personal sites such as your email, favorite news sites, social media, and more! Simply click the **Create button** on the home page.

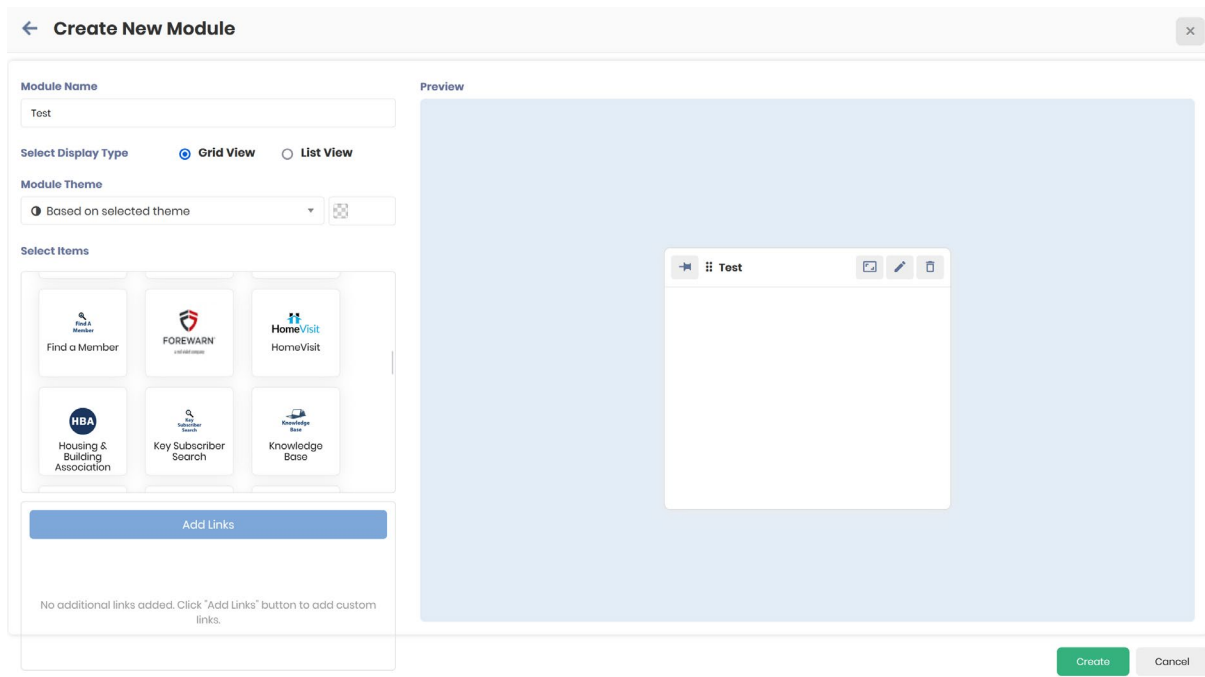

Create New Module

A screenshot of a form titled 'Create New Module'. It has two main sections. The first section is 'Module Name' with a text input field. The second section is 'Module Type' with a dropdown menu. The dropdown is open, showing 'Link' and 'Widget' options. Below the dropdown are four size options: 'Small' (25% width), 'Medium' (50% width), 'Large' (75% width), and 'Full Width' (100% width). Each size option has a radio button. The 'Small' option is selected. At the bottom right of the form are two buttons: 'Next' (green) and 'Cancel' (grey).

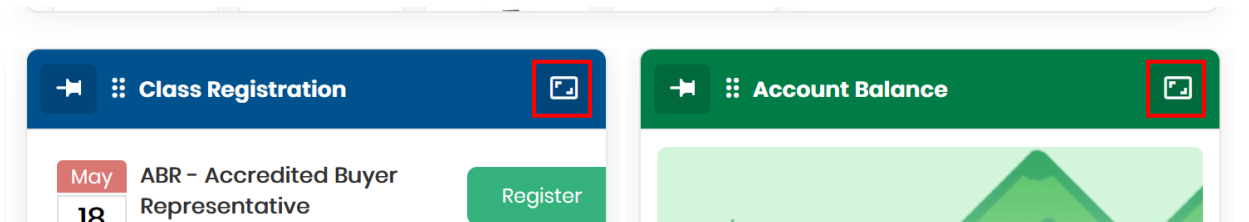

Give the new module a name and select the module type (link or widget) and size that you want to add. Click on **Next**.

Choose the Display Type (Grid View or List View) and select from a list of available links or click the **Add Links** button to add your own. When you have the module set up the way you want, click the **Create** button.

-

You can change the size of the individual modules using the icon in the upper-right corner of each module.

Click on the Pin Icon to lock your module into the position you want. If you want to move the module later, simply click on the Pin Icon again to unlock the module to allow you to move it to another position on your screen.
