

Adding Your Child's School Account to Google Chrome

Online access is easiest if you use the Google Chrome Browser and sign into your child's student account at the browser level.

If you already use Google Chrome, you have probably already signed into your own account. Begin by clicking the user circle in the top right of the browser.

Then you can click "+ Add" in the bottom.

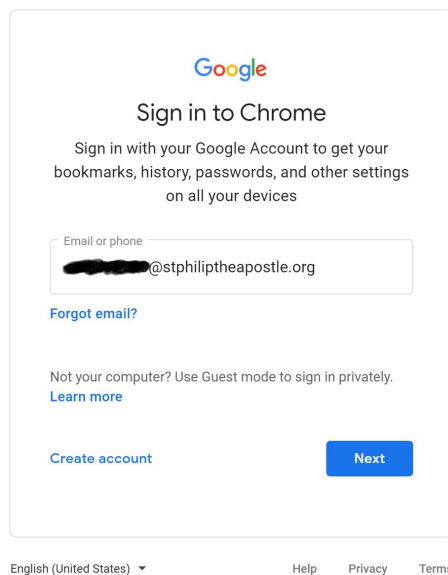

A window will appear where you name the user you're adding. Type your child's name and select an icon.

A whole new window will appear. Click on "Already a Chrome user? Sign in."

Set up your browser in a few simple steps
Make Chrome your own

The image shows the Google 'Sign in to Chrome' interface. At the top is the Google logo. Below it, the text 'Sign in to Chrome' is followed by a description: 'Sign in with your Google Account to get your bookmarks, history, passwords, and other settings on all your devices'. There is a text input field labeled 'Email or phone' containing a redacted email address followed by '@stphiliptheapostle.org'. Below the input field are links for 'Forgot email?' and 'Not your computer? Use Guest mode to sign in privately. Learn more'. At the bottom left is a 'Create account' link, and at the bottom right is a blue 'Next' button. The footer includes 'English (United States)', 'Help', 'Privacy', and 'Terms'.

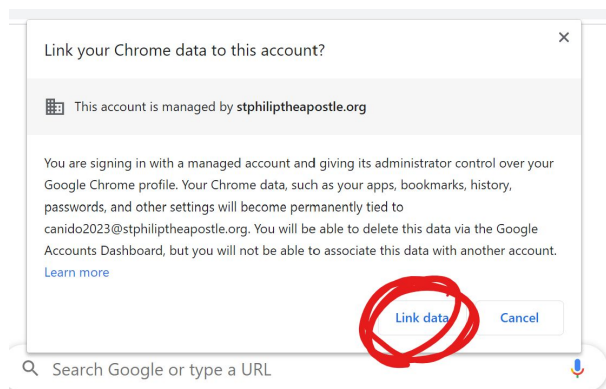

Type in your student's school email address. It is your student's first name's initial + last name + graduation year.

So if your student's name is Daffy Duck and they graduate in 2028, their email will be:

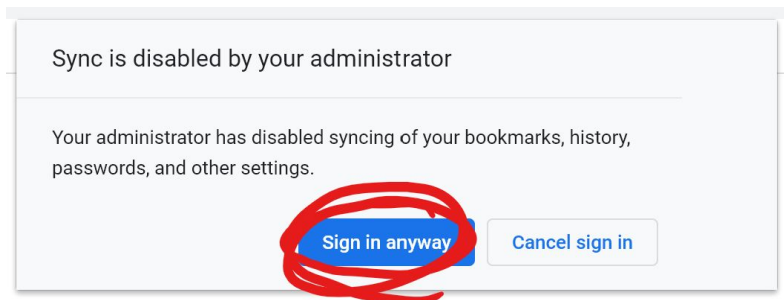

dduck2028@stphiliptheapostle.org

On the next screen, type their password.

On the next screen, click "Link Data".

This is a dialog box titled 'Link your Chrome data to this account?'. It states 'This account is managed by stphiliptheapostle.org'. The main text explains that signing in with a managed account gives the administrator control over the user's Chrome profile data (apps, bookmarks, history, passwords, etc.), which will be tied to the email 'canido2023@stphiliptheapostle.org'. It also mentions that the user can delete this data via the Google Accounts Dashboard but cannot associate it with another account. A 'Learn more' link is provided. At the bottom right, the 'Link data' button is circled in red, next to a 'Cancel' button. A search bar at the bottom contains the text 'Search Google or type a URL'.

The screen displays a message: 'Sync is disabled by your administrator'. Below this, it says 'Your administrator has disabled syncing of your bookmarks, history, passwords, and other settings.' At the bottom, there are two buttons: 'Sign in anyway' (which is circled in red) and 'Cancel sign in'.

Finally, on the next screen, click "Sign in anyway"

Now you have successfully signed into Google Chrome with your child's account. They can now use Chrome to access all their school materials.

In the future, when you need to switch between your own account and your child's. You may click the user circle in the top right and select the account you want to use. The big user icon is the one that is currently being used, and other options are near the bottom beneath "Other people". Simply click the user you want to use and Chrome will open a new window under the selected profile.
