6R'S AND SUSTAINABILITY

The 6R's are the 6 key things designers think about when designing products to be as sustainable as possible. They are... reduce, repair, reuse, recycle, rethink and refuse.

You can go up, down, forwards, backwards or diagonally in this wordsearch.
Why not time yourself to see how long it takes you to find all the words?

Practical
ACTION

6 RS DEFINITIONS

Activity sheet

RETHINK	Reprocess a material or product and make something else
REUSE	When a product breaks down or doesn't work properly, try to fix it
RECYCLE	Do we make too many products? Design in a way that considers people and the environment
REPAIR	Cut down the amount of material and energy you use as much as you can
REDUCE	Don't use a material or buy a product if you don't need it or if it's bad for people or the environment
REFUSE	Use a product to make something else with all or parts of it

Practical ACTION
