

Webinar CPD Statement

TITLE OF WEBINAR: Digital denture construction, from scanning to denture fit through the digital workflow

SPEAKER: Dr Prasanta Banerjee

EDUCATIONAL AIMS

Overview of what the activity will achieve

Discover the benefits of workflow digitisation by looking at NHS denture provision as an example.

EDUCATIONAL OBJECTIVES

Should fulfil the aim. By the end of this activity, the participant should be able to.....

- Learn the role of digital intraoral scanning in the denture workflow
- Understand the benefits of digitisation on efficiency and efficacy that can help to grow your business
- Learn how digitisation enhances communication between the dental laboratory and the dental practice

LEARNING CONTENT

Attendees will learn how the denture workflow can be digitised with iTero™ intraoral scanners to optimise outcomes for clinician, laboratory and patient.

DEVELOPMENT OUTCOMES

This CPD course meets the criteria for the GDC's development outcomes C.
