In 2017 and 2018, VOSH/International organized two successful US SVOSH Presidents' Symposia that improved cooperation and communication with our SVOSH chapters.

Following on this experience, VOSH/International is proud to launch the **SVOSH Leadership Conference** to:

- Encourage networking and cooperation.
- Strengthen knowledge and skills.
- Keep informed of the opportunities/benefits of VOSH/International membership.
- Support the development of leaders of the future.
- Support new SVOSH chapters and reconnect with others that had limited recent interaction.
- Plan together.

The Conference will be held as a series of quarterly Zoom webinars delivered in English and/or Spanish to reach as many SVOSH chapters as possible. The themes have been identified from the surveys we carried out in May reaching our US and international SVOSH chapters.

Next webinars include:

- WHO World Report on Vision and its relevance for optometry. (E/S)
- Successful fundraising
- Culturally competent eye and vision care (E/S)
- Clinical pearls for a successful eye exam in a resource limited environment (E/S)
- Scope of practise in Latin America and the Caribbean (S)
- Research protocols for school screenings (E/S)
- Trends in global eye health care (E/S)

(E/S) = English/Spanish
