Practicing Good Hygiene Etiquette

The teams at our independently owned and operated locations are encouraged to follow preventative safety measures, including the following:

- Cleaning our hands with soap often, for at least 20 seconds.
- Using hand sanitizer when available.
- Keeping a safe distance (6 feet) from others, even if they are not displaying symptoms.
- Cleaning frequently touched surfaces.
- Staying home when sick.

Keeping Our Customers Safe

- Before entering a customer's home or property, we will communicate that we're healthy and ask if our customer is as well.
- Instead of shaking hands we will greet each other verbally without any contact.
- We will utilize shoe covers to prevent tracking in contaminants.
- We will provide customers with information about protecting their health and safety.
- All customers may ask questions regarding the virus and we will answer according to the most recent company update and procedure.

What Can You Do To Help?

- Let us know in advance of your appointment if you have any concerns or if you would like us to take special precautions.
- Inform us if anyone in the household has health issues, like the flu or a cold.
- Let us know if you would like us to limit the amount of information we leave behind, and we can make adjustments or email information instead.
