

On behalf of the students and faculty at the Air Force Institute of Technology (AFIT), it is our privilege to invite you and your students to "*Discover E*" during National Engineers Week 2018. Each year, AFIT coordinates activities to celebrate and raise public understanding and appreciation of engineers' contributions to society.

It is AFIT's aspiration during this week-long celebration to inspire the upcoming generation by introducing them to the world of engineering and to nurture a diverse future engineering workforce through educational outreach initiatives. We are dedicated to ensuring a diverse and well-educated future engineering workforce by increasing understanding of and interest in engineering and technology careers among students and by promoting literacy in math and science.

We would be delighted if your students joined us February 21st or 22nd. Student slots are limited to **30 students per school** and will be assigned on a first come, first serve basis. Please RSVP no later than January 15, 2018. For further questions please contact Lieutenant Jennifer Buck at Jennifer.Buck@afit.edu

When: All day February 21st or 22nd

Who: 7th-12th grade students

Where: AFIT, Wright Patterson AFB, Area B

What: Demonstrations by local Engineers

Why: Promote student interest in STEM careers
