

## Complete your Provider Data Verification (PDV)

One of the most important functions of the CT BHP Provider Relations/Network Operations Department is to maintain an up-to-date, accurate provider database. The practice information in our CT BHP provider files is a critical component of authorizing care and supporting our online ReferralConnect application. ReferralConnect pulls data from our provider files, and assists HUSKY Health members and providers in finding available behavioral health care throughout Connecticut and bordering states.

To ensure we have accurate practice information, please complete and submit the Provider Data Verification (PDV) Form. The PDV allows providers to verify practice location, hours of operation, referral status, as well as clinical specialties and services available to our HUSKY Health members. This form also certifies that we have the best contact information to notify providers of any policy changes, new developments, and other updates.

We strongly urge providers to contact us directly with any changes to their practice. Please utilize the links below or contact the Provider Relations Department via email at [ctbhp@beaconhealthoptions.com](mailto:ctbhp@beaconhealthoptions.com) or by phone at 877-552-8247, Option 1, 2, 7.

\*Please note that the PDV form is separate from, and in addition to, the Gainwell Technologies enrollment application. Any change in contracting or credentialing information should be directed to Gainwell, through the enrollment website: [www.ctdssmap.com](http://www.ctdssmap.com) or by calling (800)-842-8440 with any new or updated information.
