

## **SUPERUSER**

### **ProviderConnect Super User Function**

The CT BHP Provider Relations Department is announcing a new ProviderConnect function where a staff member(s) at a facility or group practice can become a SuperUser and create and manage ProviderConnect User ids and Passwords for new and current staff.

Once a Super User account is activated, the assigned user will be able to:

- Create new login accounts for new staff members or members of the practice that require access to ProviderConnect.
- Manage Passwords for current and new staff members.
- Deactivate or disable a managed user when a staff member leaves your organization or no longer requires access to the ProviderConnect application.

If you are interested in becoming a SuperUser for your facility or group practice, please click the following link to access Provider Notice and Super User Account request form. [Click Here.](#)
