The evidence-based CATCH Early Childhood (CEC) program is designed to nurture a love of physical activity, provide an introduction to classroom-based gardening and nutrition, and encourage healthy eating in children ages 3-5. Little ones are motivated to walk, run, jump, dance and move their whole bodies while playing and having fun.

Thanks to generous funding from the Buell Foundation, CATCH Global Foundation is excited to provide our 3 day CEC Academy training in order to build capacity to improve healthy learning environments to young children throughout Colorado. 3 Day Academy participants (who pass our certification test at the end of our three day training): will be certified CATCH trainers who can conduct implementation trainings within their districts, organizations and regions. One full set of CEC curricula will be provided per organization sending participants to the 3 Day Academy training. Travel and lodging costs for 3 day participants will be reimbursed.
