

You've been selected for a free evaluation to experience the premium health benefits of the **ReWalk** Exoskeleton and the **MYOLYN** Myocycle for home use

To sign up, visit Rewalk.com/AZSCIA

As a partner of ReWalk Robotics, **Arizona Spinal Cord Injury Association** introduces the **ReWalk Exoskeleton**. ReWalk is a wearable robotic exoskeleton that provides powered hip and knee motion to enable individuals with spinal cord injury (SCI) to stand upright, walk, and turn at home and in the community.

It changes your whole perspective. It takes your life up a notch. I may not have everything else back, but I've got this part back.

John Benner -
Air Force Veteran

The **MYOLYN MyoCycle** uses functional electrical stimulation (FES) to empower you to achieve therapeutic exercise and functional outcomes, despite muscle weakness or paralysis caused by disorders like spinal cord injury, multiple sclerosis, and stroke. FES works by using small amounts of electricity to help muscles contract and produce functional movements.

For the first time ever, my legs are warm and healthy looking when I finish exercising with my MyoCycle from the increased blood flow through my legs. I wish I had one years ago.

Sig F. -

Ride. Walk. Repeat.

The ReWalk Exoskeleton is designed for personal use at home and in the community. It is the most customizable exoskeleton and is configured specifically for you. This precise fit optimizes safety, function and joint alignment.

MYOLYN Myocycle uses functional electrical stimulation (FES) to empower you to achieve therapeutic exercise and functional outcomes, despite muscle weakness or paralysis caused by disorders like spinal cord injury (SCI). The complimentary effects of walking with a ReWalk exoskeleton, and FES cycling with a MyoCycle, empower SCI patients to relax muscle spasms, prevent muscle atrophy, and maintain or increase range of motion.

Arizona Spinal Cord Injury Association is committed to providing therapeutic options that serve and support our SCI community at the highest level.
