

APPLICATION WHEEL FOR THE NEW AMERICAN LAWN STANDARD PROGRAM

EARLY SPRING:

Apply *Green-Up Crabgrass Preventer* to feed the lawn and provide season-long crabgrass prevention.
Apply *MAG-I-CAL* to balance your soil's pH on the same day.

LATE SPRING:

Apply *Green-Up Weed & Feed* to feed the lawn and kill over 250 broadleaf weeds like dandelions, chickweed, clover, and oxalis. Be sure to apply to a damp lawn from light sprinkling or early morning dew and do not water afterward for 48 hours.

EARLY SPRING
(MAR - APR)

LATE SPRING
(MAY - JUN)

THE NEW AMERICAN LAWN

**FEED YOUR LAWN
...AND YOUR SOIL!**

FALL
(SEPT - OCT)

SUMMER
(JUL - AUG)

FALL:

Apply *Winter Survival Fall Lawn Food* to feed the lawn and help prepare it against the long, harsh winter lying ahead.

If you're seeding in the fall, apply *Winter Survival Fall Lawn Food* the same day after applying grass seed.

SUMMER:

Apply *Love Your Soil* to feed the soil and stimulate its biology. *Love Your Soil* activates the soil microbes so they break down "trapped" nutrients in the soil. It also loosens hard soil for deeper root growth.
