

George Sullivan

Founder/CEO

Net Zero Analysis & Design Corp.

George Sullivan is passionate about helping companies grow and prosper while mitigating their environmental footprints and meeting ESG goals by creating data-driven, scientifically valid climate action plans. He uses his varied professional experience and complex problem-solving abilities when consulting with companies, organizations, learning institutions, and governments all over the world on matters of building science, renewable energy, carbon offsetting and carbon offset generation, carbon neutrality and net zero emissions.

George founded Net Zero Analysis and Design Corp. integrating 30 years of experience in engineering, industry, commodities trading, energy, and building science to provide companies and organizations with transparent, clearly-defined and globally accepted methods of measurement, validation and disclosure that stand up to scrutiny and meet United Nations guidelines and the new federal guidance.
