Healthy Together Now - Interlake-Eastern Region
Fall 2026 Grant Intake

Financial Empowerment "Super Clinics"

Did you know income is linked to health?

Helping people access benefits, resources, and financial information reduces poverty, improves quality of life, and builds a healthier, stronger community. Many families qualify for money they are not accessing. People who do not file their taxes are leaving behind an estimated **$1.7 billion** in benefits, including child benefits that can provide thousands of dollars each year.

Attention: Organizations

Are you part of an organization that would like to help vulnerable people* access benefits, resources, and financial information? Why not consider holding a super clinic?

What is a Super Clinic?

Super clinics improve health equity for vulnerable populations by removing avoidable, unfair barriers to health and wellness. Organizations, communities, and agencies partner to offer clinics that help people access key services and resources such as birth certificates, social insurance numbers, free tax filing, accessing benefits, financial counseling, bank accounts, help with problematic gambling, substance use, & more!

How to get started

Connect with your local IERHA HTN Community Contact for a list of key community partners or to see how the Healthy Together Now *Fall 2026* grant intake might support your clinic.

*** Vulnerable and underserved populations may include**

- Indigenous peoples
