My name is *Chlamydia* and I love hanging out in Manitoba. All that winter cold means fun under the covers! I like **hiding** out and you might not even know I am there. I can be a **problem** if you keep me around. It is possible to break up with me, but only if you find me first! Call me!

Yo, I am named *Gonorrhea*, but my pals call me **Clap**. I really get around and I am not picky. You might assume I am not hanging out with you because you don't see me, but **BOO**, I love surprises! My love can make your eyesight blur and your private area tingle. I am the dude for you!

I can't wait to be friends with you! My name is *Syphilis* and I love messing with **brains** and **hearts** and well, all of you! I guess you could say I like it rough enough to leave **marks**. People who aren't into that kinda thing and are fast enough can push me out the door, but they will always remember our time together!

I am *Herpes* and I am sweet on you! I won't take no for an answer. You could say I am a bit clingy. I also love it when you share me with your friends. I show my love by leaving my **marks** where you will feel them. I may be quiet at times, but I will **always** come back for you. XOXO

HPV is the name and you will have a **bumpy** road ahead of you if you hang out with me. They say love changes you and I sure think that is true. I will change you inside and out. My love can be like a **cancer**, taking you over quietly. I think I am worth the **lumps** and bumps along way, what do you think?

I'm *Hepatitis B*. I will love you and your **liver**, but it is usually a one-sided love. I am a bit crazy, loving the needle drugs, getting kinky or getting tattoos. I am a busy girl and will make you **tired**. That's OK, I will love you anyways, until death do us part.

Let's get together! I am *HIV* and once you lay down with me, you will have me **forever**. I am very loyal. I love to bring my **sick** little friends to our place to join in the good time. People think I am only into a certain kind of partner, but nah, I love them **all**. Kissing me is super safe, but if you are into more than that, I would be thrilled. I can't wait to get into your system!
