

Statement provided by Benita Finney – County Commissioner to Parents for Kids Health :

Davie County is blessed with unique and amazing people.... people who feed the hungry, people who dedicate their lives to assisting those less fortunate, people who mentor and guide, people who volunteer, people who spend hundreds of hours training to save our lives and people like those of you who are standing up for your children and educating yourselves on the available options for your family.

The foundation of DC was built by strong visionaries who did not hesitate to identify and fulfill needs and dreams. I appreciate the opportunity to serve as a Davie County Commissioner and only travel this path because I love Davie County and desire for us to remain strong and take care of our people.... our elderly, our children, and to be an advocate for those who cannot speak for themselves. I always encourage citizens to make their voices heard, to get involved, and to ensure that leadership hears each of you and cannot use silence as a justification for one-sided decision-making.

I encourage you to truly educate yourselves on the candidates running for office, encourage your friends and neighbors to vote, contact candidates with questions, follow boards, watch board meetings, and never stop standing up for your beliefs. I will continue to do what I think is right, even if I stand alone.

Thank you for being a positive reflection of our county.

Benita Finney
DC Commissioner
