

## ***Protect, Repair, Energize***

**Stress mitigation technology fueled by Yield Burst designed to increase stress tolerance and yield potential**

- Mitigate Plus triggers the plant's natural abilities to minimize stress, while providing efficient energy to the plant
- Protects and repairs the plant before, during or after a stress event by triggering 450+ enzymatic reactions in the plant
- Provides fuel and energy to support the increased enzymatic activity occurring within the plant
- This increased enzymatic activity increases photosynthesis, energy, and carbohydrate utilization that results in increased efficiencies and higher yield potential

**Mitigating stress and providing efficient energy to the plant means quicker recovery from stress events and more focus on growth and yield**

**Use Rate:**

8 fluid oz/acre

**Tank Mix Compatible:**

Highly compatible with herbicides, adjuvants and micronutrients
