

Preston DuBose has served as the E-commerce & Payment Security Manager at Texas A&M University since 2008 and a PCI Internal Security Assessor (ISA) since 2016. Preston oversees merchant compliance on his own campus and provides consultation to well over a dozen other members of the Texas A&M System.

In his time at Texas A&M University, Preston has implemented a campus-wide e-commerce system, migrated nearly 360 merchant accounts to a new acquirer, reviewed more than a thousand SAQs, and answered millions of questions about PCI (or, at least it feels like it.) This marks Preston's fourth time to speak at the PCI Workshop.

Preston recently accepted responsibility for maintaining the higher education PCI listserv, pci-compliance@listserv.tamu.edu.
