

Texas College Bridge
TEST PREP

Pilot Program Results

Increase your students' readiness for college-level coursework with TSIA2 Test Prep

A state-wide pilot of TCB's new TSIA2 Test Prep program provided outcomes data from 22 school districts for students in the 8th – 11th grades who participated in the program.

Overall Passing Rates

The TSIA2 Test Prep pilot program drove a significant number of students to passing scores in both TSIA2 Math and English.

Subject	Students Tested	Students Passed	Pilot Pass Rate
Math	3,741	819	22%
English	2,067	409	20%

Re-testing Pass Rates

The pilot program also drove positive results among student participants who had previously taken and failed the TSIA2 exam.

Subject	Students Re-tested	Students Passed	Pilot Pass Rate
Math	195	35	18%
English	101	35	35%

Sample District Highlights

A mix of small, medium and large districts participated in the pilot program and reported impressive results, including:

District A
100% Math pass rate (6/6)
78% English pass rate (7/9)

District B
78% English pass rate (7/9)

District C
72.5% Math pass rate (29/40)

District D
67% Math pass rate (2/3)
38% English pass rate (3/8)

District E
65% Math pass rate (15/23)

District F
58% Math pass rate (19/33)

District G
Successfully scaled implementation to more than 500 students per subject
34% Math pass rate (198/585)
24% English pass rate (133/561)

Financial Impact

Pilot results indicate that implementing TSIA2 Test Prep could substantially increase district HB 3 Outcomes Bonus Funding (OBF).

By applying the pilot passing rates for each participating district to their non-TSI Met population, the TSIA2 Test Prep program could generate **$2.6-2.9M** in projected OBF through **1,000+ additional passers** in English and Math, assuming 81% of these students satisfy all of the OBF requirements (based on 2024-25 CCMR rates).

If your district would like to assess potential financial impact, please email us and we can help with the OBF projection model.

Flexible Implementation Models Work

Across the pilot districts, success was demonstrated utilizing:

- Targeted interventions with small student cohorts
- Broad-scale, district-wide implementation
- Multiple support and delivery models

While implementation strategies influenced results, the data consistently show that structured TSIA2 preparation drives meaningful gains in student outcomes as early as 8th grade and up.
