

Child Care Health Consultation 101 Training

Training Overview

WHO CAN SERVE AS A CHILD CARE HEALTH CONSULTANT?

A Child Care Health Consultant must hold a current Colorado license as a registered nurse, pediatric nurse practitioner, family nurse practitioner, or pediatrician with knowledge and experience in maternal and child health.

REQUIREMENTS FOR CHILD CARE HEALTH CONSULTANTS:

- Complete CCHC 101 training
- Complete immunization training annually
- Provide the early childhood program with documentation including a biography, current medical or nursing license, and training certificates.

CONTACT:

info@healthychildcare.org

We thank The Colorado Health Foundation and the Colorado Department of Human Services for their generous support.

This 4.5 hour, face-to-face training provides specific Child Care Health Consultation information and resources to those nurses and physicians serving in this role in Colorado child care programs. Using lecture, scenarios, and interaction with colleagues, this training describes the role and competencies for this unique health role that will foster a deep understanding of health, safety, and wellness practices in child care settings. Upon completion of this course participants will be able to define commonly used terms in early childhood related to child care health consultation. We will explain the regulations and qualifications for a health consultant, review the Colorado Child Care Health Consultant Competencies, and discuss relevant content for the contract between child care program and CCHC.
