

# Can You Design An Airplane For National Aviation Day?

Name:

What is the space you left from the front of the clothespin to your wings?

What is the space you left from the back of the clothespin for the tail?

Do you think your airplane will fly? Why or why not?

## Final Thoughts:

Did you take the chance and try to fly your airplane? How far did your airplane fly?

Did you lose any pieces?

What could you change the next time?
