

ENVIRONMENT - NANCY B JONES, Chair

This poem combines the ideas about ENVIRONMENT from the October 17, 2025, Environment Workshop on Zoom with Farmer Jones.

EARTH WHISPERS

The **EARTH** whispers softly
through **NATURE'S** green song,
A reminder that we've been
connected all along.
Through **VISION** and care, we start to see clear
Our **INTERDEPENDENCE** grows stronger each year.

RECYCLE the waste, give new life its chance.
While **OXYGEN** forms where **TREES** gently dance.
In **NATIONAL PARKS**,
Wild beauty takes flight,
From dawn's golden glow to the calm of the night.

MILKWEED blooms softly,
feeding wings on the breeze,
A promise of hope between flowers and trees.
Protect the **ENVIRONMENT**,
both near and far,
For every small act shapes who we are.

Use **NATURAL CLEANERS**,
Let **TOXIC** fade,
While balance returns
to the world we have made.
Pick up the **TRASH**, let kindness take hold,
Restore what was broken,
Let harmony unfold.

Thank you for helping...
for caring to see,
That healing the **EARTH**
Begins with you and me.
